AP Computer Science Review Materials

AP Classroom
Have an account with AP Classroom? You should. Create your account and then add yourself to my classes using my class code. If you are in my Burnaby North classes, I have given you the class codes. If you are in my online classes, the class code is 77PP9A. I have unlocked all practice questions for all units.

Runestone Academy Resources SUPERSITE!
Open source Ebook, Lessons, Questions, Code Writing Online, Practice Exams, and more!
This is an excellent resource. It's an open source book and resource site. You need to register (free) for the official ebook - up to you. The lessons and practice questions don't require registration. I find the questions here are little on the basic + easy side but still good to warm up to a topic for the beginner.

Oracle The Java Tutorials
This resource has written lessons and explanations by the people that made Java telling you how things work in Java. There are topics in this tutorial that are NOT part of this course. Some sections are excellent. You might have to just around the various sections to find what you are looking for, but the material is good. I will try to provide links to what I feel are great sections in the future.
